

## YAMAHA 2012 WR450F15.5

### IMPORTANT!

#### Pre-fitting Instructions for Safari Fuel Tanks

1. Rinse tank out with a small amount of petrol and then discard the petrol. This needs to be done to remove any plastic trimmings that may be left in the tank after manufacturing.
2. Before attaching the screws and bolts to the brass inserts, insure that an anti-seize compound – grease will do – is applied to the threads. **Do not use thread retaining compounds.** If there is a risk of the screws and bolts working loose, use lock wire to secure them – mainly for endurance competition events
3. Position the fuel line so that it runs neatly and does not protrude or kink. Position the fuel line clamps and check for leaks.
